

Plans of Study

Doctoral Program

First-year students must submit a Plan of Study in the first two weeks of the Fall semester. Each student, including first-year students, must submit a new Plan of Study two weeks into the Spring semester. Blank forms may be picked up from the Graduate Program Assistant or downloaded from the “Resources” page of the Graduate Program web page.

The Plans of Study serve multiple purposes in your graduate career. First, they provide occasions for taking stock of your plans and academic progress, in consultation with your graduate advisor. If the system works properly, these moments of planning will avoid problems further down the line. Second, the Plans of Study provide the Graduate Office with a record of where you are and your plans for the future. New students should take the exercise seriously, but you should not get too worried if you don’t know precisely what your future holds.

Advanced doctoral students, who have already completed their coursework and passed their Qualifying Examinations, should submit an annual statement summarizing the year’s progress and offering some thoughts on plans for the immediate future.
